

Contents

Foreword	xi
Preface	xiii
Acknowledgments	xvii
Introduction	xxi
1 Datatype-Related Problems, XML, and CLR UDTs	1
DATETIME Datatypes	2
Storage Format of DATETIME	2
Datetime Manipulation	3
Datetime-Related Querying Problems	8
Character-Related Problems	25
Pattern Matching	26
Case-Sensitive Filters	31
Large Objects	32
MAX Specifier	32
BULK Rowset Provider	34
Implicit Conversions	36
Scalar Expressions	36
Filter Expressions	37
CLR-Based User-Defined Types	40
Theoretical Introduction to UDTs	41
Programming a UDT	48
XML Data Type	65
XML Support in a Relational Database	65
When Should You Use XML Instead of Relational Representation?	67
XML Serialized Objects in a Database	68
Using XML with Open Schema	75
XML Data Type as a Parameter of a Stored Procedure	81
XQuery Modification Statements	82
Conclusion	83

What do you think of this book?
We want to hear from you!

Microsoft is interested in hearing your feedback about this publication so we can continually improve our books and learning resources for you. To participate in a brief online survey, please visit: www.microsoft.com/learning/booksurvey/

2	Temporary Tables and Table Variables	85
	Temporary Tables	86
	Local Temporary Tables	86
	Global Temporary Tables	94
	Table Variables	96
	Limitations	96
	tempdb	97
	Scope and Visibility	97
	Transaction Context	97
	Statistics	98
	tempdb Considerations	101
	Table Expressions	102
	Comparison Summary	103
	Summary Exercise—Relational Division	104
	Conclusion	109
3	Cursors	111
	Using Cursors	112
	Cursor Overhead	114
	Dealing with Each Row Individually	115
	Order-Based Access	116
	Custom Aggregates	116
	Running Aggregations	118
	Maximum Concurrent Sessions	122
	Matching Problems	131
	Conclusion	138
4	Dynamic SQL	139
	EXEC	141
	A Simple EXEC Example	141
	EXEC Has No Interface	142
	Concatenating Variables	145
	EXEC AT	146
	sp_executesql	149
	The sp_executesql Interface	149
	Statement Limit	152
	Environmental Settings	153
	Uses of Dynamic SQL	153
	Dynamic Maintenance Activities	153
	Storing Computations	156

	Dynamic Filters	160
	Dynamic PIVOT/UNPIVOT	166
	SQL Injection	172
	SQL Injection: Code Constructed Dynamically at Client	172
	SQL Injection: Code Constructed Dynamically at Server	173
	Protecting Against SQL Injection	177
	Conclusion	179
5	Views	181
	What Are Views?	181
	ORDER BY in a View	183
	Refreshing Views	187
	Modular Approach	189
	Updating Views	198
	View Options	202
	ENCRYPTION	202
	SCHEMABINDING	203
	CHECK OPTION	204
	VIEW_METADATA	205
	Indexed Views	206
	Conclusion	211
6	User-Defined Functions	213
	Some Facts About UDFs	214
	Scalar UDFs	214
	T-SQL Scalar UDFs	215
	Performance Issues	217
	UDFs Used in Constraints	219
	CLR Scalar UDFs	222
	SQL Signature	231
	Table-Valued UDFs	239
	Inline Table-Valued UDFs	239
	Split Array	242
	Multistatement Table-Valued UDFs	248
	Per-Row UDFs	252
	Conclusion	255

7	Stored Procedures	257
	Types of Stored Procedures	258
	User-Defined Stored Procedures	258
	Special Stored Procedures	262
	System Stored Procedures	264
	Other Types of Stored Procedures	266
	The Stored Procedure Interface	267
	Input Parameters	267
	Output Parameters	269
	Resolution	273
	Compilations, Recompilations, and Reuse of Execution Plans	275
	Reuse of Execution Plans	275
	Recompilations	281
	Parameter Sniffing Problem	284
	EXECUTE AS	288
	Parameterizing Sort Order	289
	Dynamic Pivot	294
	CLR Stored Procedures	305
	Conclusion	313
8	Triggers	315
	AFTER Triggers	316
	The <i>inserted</i> and <i>deleted</i> Special Tables	316
	Identifying the Number of Affected Rows	318
	Identifying the Type of Trigger	321
	Not Firing Triggers for Specific Statements	324
	Nesting and Recursion	328
	UPDATE and COLUMNS_UPDATED	329
	Auditing Example	333
	INSTEAD OF Triggers	335
	Per-Row Triggers	336
	Used with Views	339
	Automatic Handling of Sequences	342
	DDL Triggers	344
	Database-Level Triggers	346
	Server-Level Triggers	350
	CLR Triggers	351
	Conclusion	360

9	Transactions	361
	What Are Transactions?	362
	Locks	364
	Isolation Levels	370
	Read Uncommitted	371
	Read Committed	372
	Repeatable Read	373
	Serializable	374
	New Isolation Levels	375
	Save Points	381
	Deadlocks	383
	Simple Deadlock Example	384
	Deadlock Caused by Missing Indexes	385
	Deadlock with a Single Table	388
	Conclusion	390
10	Exception Handling	391
	Exception Handling prior to SQL Server 2005	391
	Exception Handling in SQL Server 2005	395
	TRY/CATCH	395
	New Exception-Handling Functions	396
	Errors in Transactions	399
	Conclusion	409
11	Service Broker	411
	Dialog Conversations	411
	Conversations	412
	Messages	415
	Contracts	417
	DEFAULT	418
	Queues	418
	Services	423
	Begining and Ending Dialogs	424
	Conversation Endpoints	426
	Conversation Groups	428
	Sending and Receiving	430
	Sample Dialog	434
	Poison Messages	442
	Dialog Security	443

- Asymmetric Key Authentication 444
- Configuring Dialog Security..... 445
- Routing and Distribution 448
 - Adjacent Broker Protocol 449
 - Service Broker Endpoints 450
 - Routes 455
- Scenarios 460
 - Reliable SOA..... 460
 - Asynchronous Processing..... 461
- Where Does Service Broker Fit?..... 462
 - What Service Broker Is 462
 - What Service Broker Isn't 462
 - Service Broker and MSMQ..... 462
 - Service Broker and BizTalk 463
 - Service Broker and Windows Communication Foundation 463
- Conclusion 464
- Appendix A: Companion to CLR Routines..... 465**
 - Create the CLRUtilities Database: SQL Server 466
 - Development: Visual Studio 466
 - Deployment and Testing: Visual Studio and SQL Server 467
- Index.....491**
